FLEXIBLE

LED LIGHT

FL400 / FL800 / FL1600

Cineroid Flexible LED Lights use high quality LED that can produce excellent color rendering index (higher than CRI 95) and 50,000 hours of life span. This LED can produce light without any flickering with stable brightness and color temperature semi-permanently of 3400Lux (FL400 is 1800 Lux). It can produce balanced and soft color giving photographs and videos to have natural color tone.

Flexible LED Panel

The flexible Cineroid LED panel can cover more angles than regular lighting. Depending on the situations such as wide or short angles light is needed the shape of panel can be changed.

Waterproof LED Panel

Cineroid FL400/800 Flexible LED light is also water proof (LED panel only). It can be used in situations where the atmosphere is humid and in cases of rain. The panel surface is washable.

Metal Ballast

The brightness and color temperature can be controlled easily with the dimmer of Cineroid Flexible LED Controller FL. The lock button placed next to the dimmer can prevent accidental change of the brightness during filming.

CINEROID LED LIGHT

ON-CAMERA LIGHT

LOCATION LIGHT

STUDIO LIGHT

Cineroid LED Lights use high quality LED that can produce excellent color rendering index and 50,000 hours of life span. This LED can produce light without any flickering with stable brightness and color temperature. It can produce balanced and soft color giving The LEDs used in Cineroid lights are rated for 50,000 hours use and have high CRI (Color Rendering Index) values. They provide a uniformly soft light for natural tones in both photo and video use.

High Power LED

The LEDs used in Cineroid lights are rated for 50,000 hours use and have high CRI (Color Rendering Index) values. They provide a uniformly soft light for natural tones in both photo and video use.

FLICKER-FREE

The light remains flicker-free throughout all brightness. The intuitive on-board digital control panel with its bright and clear digital display makes operating the light quick and easy.

Variable Color Temperature

Color temperature is variable between 3000°K (tungsten) to 5600°K (daylight) by single knob control. A range of accessories including diffusers, barndoors, yokes, battery mounts and DMX controllers are available for Cineroid lights.

PATTERN GENERATOR & CONVERTER

Waveform & Vector Scope / Display / Durable Metal Body /
Audio Features / Various Power Options / P2I Mode /
3G/HD/SD-SDI Converter / Many types Pattern Generator /
Loop Tester

Display

PG-32e features a built-in 3.2" display on the front of the unit. It gives an immediate visual confirmation of the test patterns output and be a simple quick video confidence monitor.

Durable Metal Body

Housed in an durable aluminium body, the PG-32e is designed to be used in all professional shooting environments.

Audio Features

With an on screen audio level meter it is possible to check any HD-SDI or HDMI devices' audio using the PG-32e.

Various Power Options

PG-32e accepts many sources of power. With a voltage range of 6-17V, it's possible to power the unit using rear mounted batteries, or with the built in mini-XLR port and included D-Tap cable.

Firmware Upgradeable

The firmware of PG-32e is user upgradeable. You can download the latest firmware from the Cineroid website. (www.cineroid.com)

3G/HD/SD-SDI Converter

Cineroid PG-32e converts 3G-SDI, dual or single link HD-SDI, or SD-SDI to HDMI v1.3a for driving monitors.

P2I Mode

Output from the PG-32e can be set to progressive or interlace scan using the P2I On/Off mode.

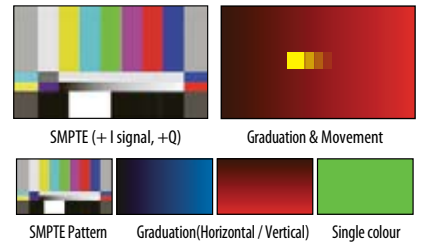

Waveform and Vectorscope

Exposure can be monitored using both waveform and vectorscope, both in real time. Three types of waveform are offered; Cr, Cb and Y.

Pattern Generator

With 16 different resolutions and frame rates in four types of test pattern, including SMPTE, errors on video and sound equipment can be quickly identified.

Loop Tester

PG-32e allows installers to quickly test, troubleshoot, and verify HDMI and HD-SDI cables with loopout. It also gives an immediate visual confirmation of the cable condition.

PG-32e Compatible Signals (input/output)

HDMI 1080@60P, 1080@59.94P, 1080@50P, 1080@30P, 1080@29.97P, 1080@25P, 1080@24P, 1080@23.98P, 1080@30PsF, 1080@29.97PsF, 1080@25PsF, 1080@24PsF, 1080@23.98PsF, 1080@60i, 1080@59.94i, 1080@50i, 720@60P, 720@59.94P, 720@50P, 720@30P, 720@29.97P, 720@25P, 720@24P, 720@23.98P, 576@50P, 576@50i, 480@60P, 480@59.94P, 480@59.94i

HD-SDI 1080@60P, 1080@59.94P, 1080@50P, 1080@30P, 1080@29.97P, 1080@25P, 1080@24P, 1080@23.98P, 1080@30PsF, 1080@29.97PsF, 1080@25PsF, 1080@60i, 1080@59.94i, 1080@50i, 720@60P, 720@59.94P, 720@50P, 576@50i, 480@59.94i
