# Orbiter<sup>®</sup>

Within the recent weeks, a few new accessories for the ARRI Orbiter have been released for sale.

## Open Face Kit for Orbiter

The new Open Face kit for Orbiter is a convenient way to complete your set of Orbiter optics. The kit is lightweight and includes a 15°, 30° and 60° Open Face optic. The optics are packed in a robust bag with reinforced corners, all around-velcro fastenings and adjustable shoulder strap. With the customized foam inlay all parts are perfectly organized, well protected, and ready to go.

The purchase of this kit offers significant savings compared to individual purchase of the contained items. The kit is in stock and ready to ship.

Please also be reminded that the foam packaging inlets of the individual Open Face optics are also made from high quality material with the intention that customers retain them for storage and/or transport when these optics are not in use.

### Control Panel Pouch

Initially, due to the long lead time for this pouch, first orders have been fulfilled with the SkyPanel remote pouch instead. As that pouch does not fit the Orbiter control panel perfectly, affected customers are eligible to order the correct pouch free of charge. The designated pouch for the control panel is now on stock and ready to ship. Order backlog will be fulfilled consequently.

### DoPchoice SnapGrid S and M 40°

We have added these two grids from DoPchoice to the softbox accessory portfolio.

The small 40° SNAPGRID° by DoPchoice attaches directly to the front of small DoPchoice SNAPBAGS, incl. the SNAPBAG S for Orbiter. In addition it fits the Chimera Lightbank for S30 and the Chimera POP Bank for S60. The SNAPGRID provides directional light control and easily folds away for storage.

### **EZ POP Soft Egg Crate 50° Chimera Octa 4**

The soft egg crate from Lighttools attaches to the front of the Chimera Octa 4 for Orbiter and provides directional light control. With a built-in tensioning frame the soft egg crate is kept taut and in perfect formation regardless of how your softbox is angled. It easily folds away for storage.

### **Multi-unit frames for Orbiter**

The development project for the four- and six-unit frames has been put on hold and the concept is currently being re-evaluated. As a result, these two items have already been removed from the ARRI website and will also disappear with the next update of the pricelist. Any potentially existing pre-orders will need to be cancelled accordingly.
